Fixings & Tools

NGP400 Aluminium & Zinc Paint

Technical Specifications	
Appearance	Metallic Silver
Contents	A solvent based solution of acrylic resin with micronized zinc and aluminium metal, propelled by butane/isobutane and propane.
Solubility	Insoluble in water
Flammability	Extremely flammable, flash point below -20oC
Temperature range	Up to 80°C
Relative density	1.08
Direction for Use	Ensure surface to be coated is clean, dry and free from grease. Shake can until agitator ball can be heard and then for a further 1 to 2 minutes. Spray from 25-30 cm, building up layers in light coats. Allow 10 minutes drying time.

- Dried film contains in excess of 60% zinc by weight
- Highly flexible, quick drying - no secondary curing necessary
- Provides excellent adhesion to clean, prepared metal surfaces
- Excellent resistance to salt spray and weathering
- Suitable for welding through
