Microwave Motion Sensor

Microwave motion and daylight sensor

The Kosnic LED integrated battens utilise high performance LEDs to offer outstanding lumen efficiency. The battens have a switchable CCT (3000/4000/6000K) and are flicker-free so they are suitable for a wide range of applications including offices, corridors, warehouses, factories and garages. The product range also has the option to build-in an emergency module and a microwave motion and daylight sensor.
