

## Brick Removing Chisel - Carbide Tipped

### MATERIAL RECOMMENDATIONS

Heavy Duty Concrete	<input type="checkbox"/>
General Concrete	<input type="checkbox"/>
Hard Bricks	<input type="checkbox"/>
Soft Bricks	<input type="checkbox"/>
Lightweight Blocks	<input type="checkbox"/>
Natural Stone	<input type="checkbox"/>
Constructional Granite	<input type="checkbox"/>
Limestone	<input type="checkbox"/>
Mortar	<input checked="" type="checkbox"/>

Very suitable  
 Not suitable

### USAGE INFORMATION

- Prior to using chisels, please ensure your machine has the 'chisel only' function as they are designed to be used on this function only.
- Before using this product the chuck shank should be thoroughly lubricated.
- Minimal force should be applied when being used.
- After using the product continuously for 10-15 minutes the chisel must be removed from the chuck and allowed to cool at room temperature.
- Lubrication must be re-applied before re-using.
- Products can fail on the shank due to temperature build up of 200°C.
- Misuse of the product will decrease the maximum time usage significantly. Shank failure due to temperature build up is not warranted.
