25, 32, 404P AC-21 Enclosed Switch Disconnectors

## Important Safety Notice $\triangle$

It is the responsibility of the person installing the electrical equipment to ensure that the installation meets the requirements of the IET wiring regulations and is therefore 'fit for purpose'. Factors such as correct selection of components, cable sizing, protective devices and Earth bonding are all critical and should be checked prior to full testing and power-up. Any other regulations applicable to the equipment being installed such as the Machinery Directive and current health and safety legislation must also be adhered to.
Terminals, including factory fitted, should be checked periodically to ensure correct tightness.

## Terminal Configuration

## Procedure to dismantle the cover:

- Ensure the switch is in the OFF position
- Unscrew the cover screws \& remove the cover
- For easy wiring the switch can be removed from the base \& then clicked back into place once wiring is complete
- After wiring ensure the profile orientation of the actuating spindle \& knob shaft are in the same position
- Replace the cover \& take care not to overtighten the screws (recommended tightening torque 0.5 Nm )
- Do not install using power driven screwdrivers

Please Note: There is no need to remove the switch handle in order to remove the cover.
