

Download the LUXNAControl APP for iOS or Android.

Link to your smartphone or tablet using the LUXNA APP Gateway Kit via your network connection.

Visit www.luxna-lighting.com for further details and setup information.

LUXNAControl

AUTOMATE YOUR WORLD

Applications:

- Use in the home to dim the light intensity and change the colour temperature, creating beautiful moods and ambiance to suit your personal taste.
- Use in any commercial application including hotels, restaurants and offices to stimulate the senses and add style to the architectural surroundings.

Feature Highlights:

- Adjustable LED light intensity with a standard dimming range from 5% to 100% including Night Light mode which is 2% of the maximum brightness.
- Control the colour temperature of the LED lighting with ease, choose from:
 - Warm White 3000K – Perfect for promoting relaxation whilst creating a friendly or intimate setting.
 - Neutral White 4000K – For a natural ambiance to compliment décor and enhance interior features.
 - Cool White 6000K – Be alert and increase productivity. Ideal for a clean, fresh energising feel.
- Expand the usability of the system by adding other electrical devices linked via the LUXNA Lighting Smart Gateway.
- Easy to use, simple to install and setup.
