

SDS Max Hammer Drill Bits

RECOMMENDED SPEED

Recommended speed for SDS Max is largely governed by the power tool itself. This is because the product is designed to be used in power tools where in the majority of cases there is no facility to regulate the speed (i.e. SDS Max machines). If used in a machine where speed regulation is possible, a general recommendation is the larger diameter of the drill bit being used, the slower the speed.

SDS Max Cross Head

SDS Max Single Tip

MATERIAL RECOMMENDATIONS

Heavy Duty Concrete	●	Natural Stone	●
General Concrete	●	Constructional Granite	●
Hard Brick	●	Limestone	●
Soft Brick	●	● Very suitable	
Lightweight Block	●		

TECH TIP

A little grease on the shank of the drill bit will reduce heat build-up and improve power tool life

Wear eye protection

Wear hearing protection

Wear hand protection

Wear a face mask
